4	s,s,s,s	s,l,s,s	current for combustion air motor too high	combustion air motor or cable harness defective	check / replace combustion air motor	check / replace cable harness of combustion air motor replace electronic PCB
5	s,s,s,s	s,l,s,l	current for combustion air motor too low	combustion air motor or cable harness defective	check / replace combustion air motor	check / replace cable harness of combustion air motor replace electronic PCB
6	s,s,s,s	s,l,l,s	current for combustion air motor too high	combustion air motor or cable harness defective	check / replace combustion air motor	check / replace cable harness of combustion air motor replace electronic PCB
7	s,s,s,s	s,l,l,l		unassigned	recheck flash code	
8	s,s,s,s	l,s,s,s	electronic fault	failure in electronic PCB	recheck flash code	restart heater replace electronic PCB
9	s,s,s,s	l,s,s,l		unassigned	recheck flash code	
10	s,s,s,s	l,s,l,s	plausibility of combustion air temperature sensor	combustion air temperature sensor outside tolerance range	check cable of combustion air temperature sensor	check (read) / replace combustion air temperature sensor
11	s,s,s,s	l,s,l,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater replace electronic PCB
12	s,s,s,s	l,l,s,s		unassigned	recheck flash code	
13	s,s,s,s	l,l,s,l		unassigned	recheck flash code	
14	s,s,s,s	l,l,l,s		unassigned	recheck flash code	
15	s,s,s,s	l,l,l,l		unassigned	recheck flash code	
15*	s,s,s,s	l,l,l,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater replace electronic PCB
16	s,s,s,l	s,s,s,s		unassigned	recheck flash code	
16*	s,s,s,l	s,s,s,s	electronic fault	failure in electronic PCB	recheck flash code	restart heater replace electronic PCB
17	s,s,s,l	s,s,s,l		unassigned	recheck flash code	
18	s,s,s,l	s,s,l,s		unassigned	recheck flash code	
19	s,s,s,l	s,s,l,l	plausibility of electronic	heater does not match electronics (e.g. 6 kW PCB in 4 kW heater)	install correct electronics	
20	s,s,s,l	s,l,s,s	plausibility of NTC water temperature	water temperature sensor outside tolerance range	check cable of water temperature sensor	check (read) / replace water temperature sensor 20°C 12.6 k Ω 25°C 10.0 k Ω 40°C 5.0 k Ω 50°C 3.3 k Ω
21	s,s,s,l	s,l,s,l	plausibility of NTC room temperature	room temperature sensor outside tolerance range	check cable of room temperature sensor	check (read) / replace room temperature sensor 15°C 16.2 k Ω 20°C 12.6 k Ω 25°C 10.0 k Ω
22	s,s,s,l	s,l,l,s	plausibility of NTC air temperature	air temperature sensor outside tolerance range	check cable of air temperature sensor	check (read) / replace air temperature sensor 20°C 124.9 k Ω 25°C 100.0 k Ω 50°C 36.0 k Ω check the thermostat plate / air temperature switch / air temperature sensor for damage caused by overheating => inform the customer service
23	s,s,s,l	s,l,l,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater replace electronic PCB
24	s,s,s,l	l,s,s,s	current for warm air motor too high	warm air motor failure	check (apply 12 V) / replace warm air motor	replace electronics
25	s,s,s,l	l,s,s,l	current for warm air motor too low	warm air motor or connection plug failure	check / replace warm air motor	replace electronics

Fault no.:	Flash code s = short l = long	Fault	Fault description	Action requirements			
				1st action	2nd action	3rd action	
Please note* lines highlighted in yellow contain the changed assignment of the fault numbers: valid from Index 4/12, 6/12, 4/12A, 6/12A							
Please note* lines highlighted in pale orange contain the changed assignment of the fault numbers: valid from Index 4/11, 6/11							
Please note lines highlighted in light green contain the revised fault numbers: valid for all versions							
26	s,s,s,l	I,s,l,s	current for warm air motor too high	warm air motor failure	check (apply 12 V) / replace warm air motor	replace current electronics for latest replacement PCB (from version 12 A)	
27	s,s,s,l	I,s,l,l		unassigned	recheck flash code		
28	s,s,s,l	I,l,s,s	current for control panel too high	control panel or control panel cable failure	check / replace control panel cable	replace control panel	replace electronic PCB
29	s,s,s,l	I,l,s,l	current for FrostControl heating element too high	heating element or cable defective	check / replace heating element	replace electronics	
30	s,s,s,l	I,l,l,s	current for solenoid valve 2 KW retaining coil too high	solenoid coil or cable harness defective	check / replace solenoid coil	check / replace cable harness	replace electronic PCB
31	s,s,s,l	I,l,l,l	current for solenoid valve 4 KW retaining coil too high	solenoid coil or cable harness defective	check / replace solenoid coil	check / replace cable harness	replace electronic PCB
32	s,s,l,s	s,s,s,s		unassigned	recheck flash code		
33	s,s,l,s	s,s,s,l	current for solenoid valve 2 KW restraining coil too high	solenoid coil or cable harness defective	check / replace solenoid coil	check / replace cable harness	replace electronic PCB
34	s,s,l,s	s,s,l,s	current for solenoid valve 4 KW restraining coil too high	solenoid coil or cable harness defective	check / replace solenoid coil	check / replace cable harness	replace electronic PCB
35	s,s,l,s	s,s,l,l		unassigned	recheck flash code		
36	s,s,l,s	s,l,s,s	current for ignitor too high	ignitor or cable harness defective	replace ignitor	check / replace cable harness	
37	s,s,l,s	s,l,s,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
38	s,s,l,s	s,l,l,s	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
39	s,s,l,s	s,l,l,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
40	s,s,l,s	I,s,s,s	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
41	s,s,l,s	I,s,s,l	electronic blocked	electronic blocked: – because the air temperature switch and / or water temperature switch opened during operation. – because the air temperature switch is damaged – due to a short-circuit of the combustion air temperature sensor	– check the heating system for over-heating damage – check the thermostat plate / air temperature switch / air temperature sensor for damage caused by overheating => inform the customer service	check / replace: – air temperature switch and cable – water temperature switch – combustion air temperature sensor and cable harness	replace electronic PCB
42	s,s,l,s	I,s,l,s	window switch open	window opened with window switch / bridge for window switch on electronics interrupted	close window / check / replace window switch with cable	check secure fit / contact of bridge on PCB	replace electronic PCB
43	s,s,l,s	I,s,l,l	over voltage higher than 15 V	12 V power supply failure	recondition power supply 12 V	replace electronics	
44	s,s,l,s	I,l,s,s	under voltage lower than 10.5 V	12 V power supply failure	recondition power supply 12 V	replace electronics	
45	s,s,l,s	I,l,s,l	no 230 V supply to Combi E	230 V power supply failure	check 230 V voltage	reset / check 230 V WTS	

Fault no.:	Flash code s = short l = long	Fault	Fault description	Action requirements			
				1st action	2nd action	3rd action	
Please note* lines highlighted in yellow contain the changed assignment of the fault numbers: valid from Index 4/12, 6/12, 4/12A, 6/12A							
Please note* lines highlighted in pale orange contain the changed assignment of the fault numbers: valid from Index 4/11, 6/11							
Please note lines highlighted in light green contain the revised fault numbers: valid for all versions							
46	s,s,l,s	l,l,l,s	– control panel Combi or energy selector switch Combi E defective – combustion air motor or hot-air motor defective – battery earth to the minus terminal Combi defective	– control panel or control panel cable defective – energy selector switch Combi E or control panel connection cable defective – combustion air motor defective. – cable harness defective – electronics defective (paint spray in control panel socket) – internal connection between the (+) carbon brushes and/or DC motor and DC motor casing via carbon dust – earth connection from the power supply is missing	check / replace control panel/cable and plug-in contact on the electronics	check supply line of combustion air motor - black cable for short-circuit to ground or red cable for interruption / replace cable harness (if cable harness not damaged, replace combustion air motor)	check electronic PCB for paint spray in control panel socket (replace electronic PCB)
47	s,s,l,s	l,l,l,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
48	s,s,l,l	s,s,s,s		unassigned	recheck flash code		
48*	s,s,l,l	s,s,s,s	water temperature switch over-temperature or air temperature switch over-temperature	fault: – because the air temperature switch and / or water temperature switch opened during operation.	– check the heating system for over-heating damage – check the thermostat plate / air temperature switch / air temperature sensor for damage caused by overheating => inform the customer service	– check / replace the water temperature switch and water temperature sensor – check / replace the air temperature switch / sensor and cable – check / replace the circulating air motor	replace electronic PCB (Error 41 can occur by switching on / off – see error no.41)
49	s,s,l,l	s,s,s,l		unassigned	for over-heating damage		
49*	s,s,l,l	s,s,s,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
50	s,s,l,l	s,s,l,s	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
51	s,s,l,l	s,s,l,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
52	s,s,l,l	s,l,s,s	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
53	s,s,l,l	s,l,l,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
54	s,s,l,l	s,l,l,s	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
55	s,s,l,l	s,l,l,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
56	s,s,l,l	l,s,s,s	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
57	s,s,l,l	l,s,s,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
58	s,s,l,l	l,s,l,s	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
59	s,s,l,l	l,s,l,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
60	s,s,l,l	l,l,s,s	power fluctuation	power supply not constant	apply 12 V power supply	replace electronics	
61	s,s,l,l	l,l,s,l	failure due to ignition procedure	ignition spark interfering with electronics	ignitor must have orange label, otherwise replace ignitor	check ignitor / flame rectification electrode cable for damage / replace	replace electronic PCB
62	s,s,l,l	l,l,l,s	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
63	s,s,l,l	l,l,l,l	electronic fault	failure in electronic PCB	recheck flash code	restart heater	replace electronic PCB
