HOT WATER AT THE FLICK OF A SWITCH

The Dometic Atwood water heater delivers hot water in less than thirty minutes. Simply flick the switch to turn the water heater on or off. This hot water system is lightweight and adaptable to gas or electric power sources and stores energy while driving in order for usage once you've stopped. It comes with multiple protection features including a pressure and temperature relief valve, a high temperature limit switch and thermostat. An externally sealed combustion chamber keeps the outside of the unit clean, whilst the exterior door allows for easy access for servicing. Easy to install, you can mount the water heater flush into the RV sidewall. Flexible mounting options include pre-skin installation.

BENEFITS WITH HOT WATER SYSTEM

- Advanced design for efficient water heating
- Only 8.6 kg when empty
- Pressure and temperature relief valve, a high temperature limit switch and thermostat
- Easy access for servicing through the exterior door
- Operates on gas or electric and stores energy when driving
- Flexible mounting options including pre-skin installation
